

**S M T W T F S**

Cut out this window.

Cut slits for the track beside the S for Sunday and the S for Saturday.

The lines in the margins of the calendar page are the location of the bottom of the track.

**S M T W T F S**

Cut out this window.

Cut slits for the track beside the S for Sunday and the S for Saturday.

The lines in the margins of the calendar page are the location of the bottom of the track.

The first step in cutting out the windows is to extend these four lines to the edges of the page. Then cut along these lines. Each long strip is a track. Lengthen the slits as required to fit the track. The bottom of each slit should be in line with the top of the window so that the bottom of the track is along the top of the window.
