How the year table is constructed

For Common Years, the year is under the day of the week that Jan. 1 falls on. For example, Jan. 1, 2001 was on Monday. For Leap Years, the year is under the day of the week after the day that Jan. 1 falls on. For example, Jan. 1, 2000 was on Saturday.

If you find this calendar useful, help others learn about standalone perpetual pocket, desk and wall calendars by suggesting that your public and school libraries add the above book to their collections. Hasten the day when resources are saved every year by

---

Congratulations on acquiring a unique perpetual calendar for 2019 and the years beyond. This calendar, which is made from a single 8.5 by 11 inch sheet of 100 lb. cardstock, is expected to last 10 years with normal wear and may last until 2099, which is the last entry in the year table! In addition to saving resources and avoiding the inconvenience of annual replacement, this calendar can be used to find out when a special day will fall on a Sunday or another day of the week. Simply set the day to Sunday and read the years under the month. Sometimes, this technique can be used to

A good website for finding holidays and phases of the moon is www.timeanddate.com/calendar.

Boxing Day	December 26

Advent begins on the 4th Sunday before Dec. 25
Epiphany begins on Jan. 6
Pentecost Sunday is the 7th Sunday after Easter
Lent begins on Ash Wednesday
Most of Canada and the United States observe Daylight Saving Time from the second Sunday in March to the first Sunday in November.

INSTRUCTIONS

1. Move slider to set month over year.
2. Leap years are bold. Use top row of month table for January and February.
3. Ignore 29, 30 and 31 when applicable.
4. Hold table for 19th or 20th century in front of 21st century to display months for these centuries.
