### Claim~Evidence~Reasoning

How do body systems interact to carry out life's processes and maintain homeostasis?  
Choose 3 body systems. Write a claim that defines how they interact. Then use a minimum of 3 pieces of evidence to support your claim.

CLAIM: State your answer to the question.

EVIDENCE: What support do you have for your answer? How do you know this?

REASONING: Using each piece of evidence stated above, support your claim/overall answer.
